PROFESSIONAL SUMMARY

AI/ML and Software Developer with hands-on experience building **AI-powered workflows, automation systems, backend services, and API integrations**. Experienced with **Python, LLMs, AI agent orchestration, REST APIs, Node.js, and enterprise system integrations**, with a strong focus on applying AI to practical business and operational problems. Skilled in researching emerging AI technologies, rapidly prototyping solutions, and integrating AI capabilities into production-oriented applications. Strong problem-solving, analytical, and communication skills with an ownership-driven approach to learning and implementation.

EDUCATION

Parul University

B.Tech, Computer Science Engineering — CPI: 8.21

Vadodara, Gujarat

2022 – 2026

PROFESSIONAL EXPERIENCE

AI/ML Intern

Jan 2026 – Jun 2026

MyOnsiteHealthcare

Onsite

- Implemented **AI agent orchestration** and automated workflows to support enterprise operational processes and real-time data-driven applications.
- Built and integrated **REST APIs and third-party system integrations**, connecting operational, governance, billing, and administrative workflows into a unified platform.
- Implemented **Keycloak SSO/RBAC** and **Vault-based secret management** to secure AI-enabled enterprise workflows and system integrations.
- Developed **GitLab CI/CD automation** using self-hosted runners, SSH-based deployments, and secure environment variables to streamline application delivery.
- Designed **programmatic automation workflows** for large-scale SEO operations, improving content quality, pagination handling, and search ranking processes.

AI/ML Intern

Jul 2025 – Dec 2025

Joflee

Remote

- Developed and evaluated machine learning solutions using **Python, TensorFlow, PyTorch, and Scikit-learn**, covering data preprocessing, feature engineering, model development, and testing.
- Worked on end-to-end ML workflows and collaborated on integrating machine learning components into practical software applications using version control and structured development practices.

AI & AUTOMATION PROJECTS

AI Multimodal Video Captioning Tool | *Python, Gradio, Whisper, BLIP, YOLOv8, HuggingFace* | GitHub

- Built an AI-powered application combining **Whisper speech-to-text, BLIP image captioning, YOLOv8 object detection**, and HuggingFace models to automatically transform video content into transcripts, captions, and scene descriptions.
- Designed an automated processing pipeline that combines audio, visual, and language models to generate structured outputs from unstructured video data.
- Implemented quality evaluation using audio SNR, blur detection, and readability metrics to improve reliability of generated outputs and automated subtitles.

AI-Powered Productivity Chrome Extension | *JavaScript, Perplexity AI API, Chrome Extension APIs* | GitHub

- Developed an AI-powered browser extension integrating the **Perplexity AI API** to automatically summarize YouTube videos and generate timestamp-linked insights.
- Designed API-driven automation workflows that convert long-form video content into concise, actionable information through LLM-based processing.
- Integrated browser APIs to combine AI-generated outputs with enhanced video controls and an interactive user experience.

Compliance Document Tracker | *React, Node.js, Express, PostgreSQL, Prisma, Docker, JWT* | GitHub

- Built a full-stack document management platform with **REST APIs, JWT authentication, PostgreSQL, automated email reminders, and scheduled cron workflows**.
- Automated compliance tracking and notification workflows while implementing secure document handling, relational data models, dashboard analytics, and Dockerized deployment.

TECHNICAL SKILLS

AI / Generative AI: LLMs, Generative AI, Prompt Engineering, AI Agent Orchestration, RAG, Hugging Face, Conversational AI, AI Workflows

AI / ML: Python, PyTorch, TensorFlow, Scikit-learn, NLP, Computer Vision, Model Evaluation, Feature Engineering

Automation & APIs: REST APIs, API Integrations, Workflow Automation, FastAPI, Express.js, WebSockets, Third-Party Integrations, Cron Jobs

Backend / Full Stack: Node.js, TypeScript, JavaScript, React.js, PostgreSQL, MongoDB, MySQL

AI Infrastructure: Vector Databases (Chroma), Hugging Face, Docker, AWS, Git, GitLab CI/CD

Security / Enterprise: Keycloak SSO/RBAC, Vault, JWT Authentication, Secure API Integrations

LEADERSHIP, HACKATHONS & CERTIFICATIONS

Leadership: Anchor, CDC (Career Development Cell) | Team Technical, PU AI Society | Team Finance, PU Projections '24

Hackathons: PUCodeHackathon 2.0

Certifications: Database and SQL (Infosys) | AWS Academy Cloud Foundations (AWS) | ChatGPT Prompt Engineering for Developers (DeepLearning.AI) | Problem Solving (HackerRank)
