PROFESSIONAL SUMMARY

Software Developer with hands-on experience building Node.js/TypeScript backend services, Python-based AI/automation systems, and REST API integrations for enterprise platforms. Skilled in leveraging AI coding assistants and AI-native workflows to rapidly prototype and ship production-ready features without compromising code quality or scalability. Experienced with CI/CD pipelines, AI agent orchestration, third-party and system integrations, and relational/NoSQL data layers, backed by a strong ownership mindset and the ability to learn new tools quickly in fast-paced, cross-functional teams.

EDUCATION

Parul University

B.Tech, Computer Science Engineering — CPI: 8.21

Vadodara, Gujarat

2022 – 2026

PROFESSIONAL EXPERIENCE

AI/ML Intern

Jan 2026 – Jun 2026

MyOnsiteHealthcare

Onsite

- Implemented **GitLab CI/CD pipelines** using self-hosted runners, SSH-based deployments, and secure environment variable management to automate build, test, and production release workflows.
- Developed scalable **programmatic SEO** workflows addressing content quality, pagination, and search ranking optimization across large-scale web properties.
- Implemented **AI agent orchestration**, **Keycloak SSO/RBAC**, **Vault-based secret management**, and real-time data integration workflows for a production-scale enterprise operations platform.

AI/ML Intern

Jul 2025 – Dec 2025

Joflee

Remote

- Applied machine learning techniques to real-world projects — model development, testing, optimization, and building data pipelines for preprocessing and feature engineering.
- Conducted experiments using **TensorFlow**, **PyTorch**, and **Scikit-learn**; collaborated on cross-functional projects to integrate ML components into end-to-end systems with version control and code reviews.

PROJECTS

Compliance Document Tracker | React, Node.js, Express, PostgreSQL, Prisma, Docker, JWT | GitHub

- Designed and developed a full-stack compliance document management system with secure **JWT authentication**, PDF uploads, and **RESTful APIs**. Implemented relational database modeling, **SQL**-based dashboard analytics, automated email reminders using **cron jobs**, and **Dockerized** deployment with comprehensive API documentation.

LeadForge — AI-Powered Lead Generation Platform | FastAPI, Python, Next.js, PostgreSQL, SQLAlchemy, Docker | Live Demo | C

- Built a full-stack **AI-powered lead generation and outreach platform** with a FastAPI backend, Next.js dashboard, and PostgreSQL database to manage, research, score, and track sales leads.
- Implemented **REST APIs**, **asynchronous SQLAlchemy operations**, **AI prompt workflows**, **CRUD services**, and a Kanban-based pipeline with AI-generated lead intelligence and personalized outreach drafts.

Ride Rescue — Motor Mechanic Web App | React, Vite, Tailwind CSS, Supabase | Live Demo

- Developed a responsive web app using **React + Vite** and **Tailwind CSS** connecting users with verified motor mechanics for real-time roadside assistance.
- Integrated **Supabase** for authentication, database management, and real-time location tracking, with secure in-app payments and transparent pricing.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (Node.js), Python, Java, C, SQL

Backend / APIs / Integrations: REST APIs, FastAPI, Express, WebSockets, third-party & enterprise system integrations, automation workflows

AI Development: AI agent orchestration; GenAI & conversational-AI workflows; RAG; Vector Databases (Chroma); Hugging Face; PyTorch

Databases: PostgreSQL, MySQL, MongoDB, Redis

Cloud / DevOps: AWS, Docker, Git, CI/CD (GitLab pipelines, self-hosted runners), Keycloak SSO/RBAC, Vault

LEADERSHIP, HACKATHONS & CERTIFICATIONS

Leadership: Anchor, CDC (Career Development Cell) | Team Technical, PU AI Society | Team Finance, PU Projections '24

Hackathons: PUCodeHackathon 2.0

Certifications: Database and SQL (Infosys) | AWS Academy Cloud Foundations (AWS) | ChatGPT Prompt Engineering for Developers (DeepLearning.AI) | Problem Solving (HackerRank)
